## NOTES

A. GUTSZE, J.-P. LANGE, H. G. KARGE, AND J. ALLGEIER. Carbonization of Polyethylene over Acidic Zeolites.....	525
ROBERT L. MCCORMICK AND G. L. SCHRADER. A Study of the Activity and Selectivity of Molybdenum Crystallographic Shear Compounds in the Oxidation of C <sub>4</sub> Hydrocarbons .....	529
S. FUENTES, G. DIAZ, F. PEDRAZA, H. ROJAS, AND N. ROSAS. The Influence of a New Preparation Method on the Catalytic Properties of CoMo and NiMo Sulfides .....	535
ISAO SUZUKI, HISAE SATO, KEN-ICHI SAITO, AND SHOICHI OKI. Apparent Abnormal Adsorption of Nitrogen over NaA Zeolite and Adsorption of Helium .....	540
JIN-HO LEE, DONG-KEUN LEE, AND SON-KI IHM. Independent Effect of Particle Size and Reduction Extent on CO Hydrogenation over Alumina-Supported Cobalt Catalyst.....	544
RALPH W. MATTHEWS. An Adsorption Water Purifier with <i>in Situ</i> Photocatalytic Regeneration.....	549
B. MAHIPAL REDDY, K. SAI PRASAD RAO, AND V. M. MASTIKHIN. Characterization of MoO <sub>3</sub> /SiO <sub>2</sub> and WO <sub>3</sub> /SiO <sub>2</sub> Catalysts by Low-Temperature Oxygen Chemisorption, <sup>1</sup> H MAS NMR, and XRD Techniques .....	556
MAMORU AI. Effects of Organic Compounds Used in Preparing V/Ti Binary Phosphate Catalysts .....	562

## LETTERS TO THE EDITORS

ROBERT L. BURWELL, JR. The Hydrogenolysis of Alkanes on Metallic Molybdenum on Alumina .....	567
--	-----

YVES HOLL, FRANCOIS GARIN, AND GILBERT MAIRE. On the Nature of Catalytic Active Sites on Molybdenum Catalysts .....	569
T. T. TSOTSIS, R. C. SANE, I. A. WEBSTER, AND J. D. GODDARD. Reply to "Comment on 'Theoretical and Experimental Aspects of Surface Diffusion in Porous Catalysts'" by Onno L. J. Gijzeman .....	572
AUTHOR INDEX FOR VOLUME 113.....	573

The Subject Index for Volume 113 will appear in the December 1988 issue as part of a cumulative index for the year 1988.

## INFORMATION FOR AUTHORS

The *Journal of Catalysis* publishes articles dealing with original studies in heterogeneous and homogeneous catalysis as well as studies relating catalytic properties with chemical processes at surfaces, studies of chemistry of surfaces, and engineering studies related to catalysis. All articles will be published in English.

**Submission of Manuscripts.** Manuscripts should be sent by registered mail to either of the Editors:

Professor Gary L. Haller  
Department of Chemical Engineering  
P.O. Box 2159 Yale Station  
Yale University  
New Haven, Connecticut 06520

Professor Frank S. Stone  
School of Chemistry  
University of Bath  
Bath BA2 7AY, England

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Catalysis* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

**Form of Manuscript.** Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. Submit manuscript (in English) in triplicate, including the original typewritten copy, with copies of all figures and tables. All material (including tables, reference lists, etc.) should be typed double-spaced on one side of 8.5 × 11-in. white bond paper (with 1-in. margins on all sides). Each page of the manuscript should be numbered. *Page 1* should contain the article title, authors' names (without degrees), affiliations, a running title (abbreviated form of title) not exceeding 45 letters and spaces, and an address to which proof should be mailed. *Page 2* should contain a short abstract.

Authors should use descriptive headings in this order: Abstract, Introduction, Methods, Results, Discussion, Acknowledgments, and References.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

**Notes and Letters to the Editor** may not exceed 8 double-spaced typewritten manuscript pages (including tables and figures). Accepted Notes will not receive publication priority over articles.

Letters to the Editor will be considered for priority publication under the following conditions: (a) Letters must be related to some statement made in a recently published article in this Journal; (b) in cases of conflicting views on any topic, no more than one Letter from each author will be accepted.

Units of weights, measures, etc., when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm).

The SI (Système International) system of units will be accepted without editorial change. Authors using other units are encouraged to define them in terms of SI units once in each publication, e.g., in an article where pressures are quoted in Torr to write "1 Torr = 133.3 N m<sup>-2</sup>." For information concerning SI units, see *Quantities, Units and Symbols for Physical Chemistry*, 4th ed., prepared by I. Mills and published by Blackwell Scientific, Oxford, 1988.

**Footnotes** should be avoided if possible; but if essential, they should be designated by superscript Arabic numerals (starting with title) in the text.

**Tables** should be numbered with Arabic numerals in order of mention in the text. They should be typed double-spaced on separate pages. Each table should have a short descriptive caption typed (double-spaced) above the table. Table footnotes (indicated by superscript, lowercase, italic letters) should be typed at the end of the table.

**Figures** should be numbered with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed double-spaced together on a separate page. All illustrations should be in finished form suitable for photoreproduction. No figures should exceed 8.5 × 11 in. (21 × 27.5 cm). Drawings could be made with India ink on tracing linen, good quality tracing paper, smooth surface white paper, or Bristol board. Graph paper if used should be ruled in blue. Grid lines that are to show in the final reproduction should be inked in black.

Copies of drawings are not acceptable unless they are high contrast glossy prints. All but the very simplest structures and structural formulas must be designed for direct reproduction. Lettering should be large enough to be legible after a reduction of 50–60%. Illustrations in color can be accepted only if the authors defray the cost.

**References** to the literature should be cited in the text by italic Arabic numerals in parentheses, set on the text line, and listed numerically at the end of the paper. Abbreviations of journal titles should follow the style used in *Chemical Abstracts' Service Source Index*, 1985. Style and punctuation of references should be in accordance with the following examples:

McVicker, G. B., Kramer, G. M., and Ziemiak, J. J., *J. Catal.* **83**, 286 (1983).

Klier, K., in "Advances in Catalysis" (D. D. Eley, H. Pines, and P. B. Weisz, Eds.), Vol. 31, p. 243. Academic Press, New York, 1982.

Pines, H., "The Chemistry of Catalytic Hydrocarbon Conversions." Academic Press, New York, 1981.

**Proofs.** Proofs will be sent to the author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

**Reprints.** Fifty reprints without covers will be provided free of charge. Additional reprints may be purchased; an order form will be included with proofs.
